

Home Learning Tasks for a Snow Day!

Maple Class

In addition to your weekly homework (attached in case you have lost it!) have a try at the activities below:

1. Continue to learn the 8x table and the related division facts.
2. Answer a variety of questions to help with your fraction learning - just follow the link depending on your year group.
 - Understand Fractions: <https://uk.ixl.com/math/year-4>
 - Understand Fractions <https://uk.ixl.com/math/year-5>
3. Continue to read and complete the Rainbow Reading Challenge if you haven't done this already.
4. Write a definition for 'a thermal insulator' and 'a thermal conductor' and produce a poster to let other people know what they are. Can you use diagrams, colour and text? Can you find examples around your home to include on your posters?
5. Write a short explanation about how something works around your home or how snow is formed and how it melts away. Can you include the words: first, then, next, in order to, because?
6. Lastly, can you make a snowman and take a photograph of you with your creation? You could even write a character description for your snowman!

ENJOY!
